

Meet Dr. Shira Kresch

Dr. Shira Kresch is a primary care optometrist who specializes in the non-surgical treatment and management of glaucoma as well as myopia control. After obtaining her BS in Nutrition and Food Science from Wayne State University Honors College with a co-major in University Honors, she received her OD/MS degrees from the State University of New York and completed her residency in primary care and ocular disease at the NY VA Harbor Healthcare System under the supervision of Dr. Murray Fingeret and Dr. Evan Canellos.

Following residency, Dr. Kresch underwent further training with Dr. Jeffrey Liebmann and Dr. Jack Cioffi in the glaucoma service at Columbia University Medical Center where she is currently an Instructor of Optometric Sciences in Ophthalmology and the clinic lead of the myopia control clinic.

In addition to her clinical work, Dr. Kresch pursues research in the areas of early detection of glaucoma and technological advances in patient education.

Southfield Optometrist That You Can Trust

Dr. Shira Kresch has been practicing optometry for over 7 years at some of the most prestigious medical centers in the country, including Columbia University's Department of Ophthalmology and Kresge Eye Institute.

Procedure for a Check-up

During an optometric exam, an optometrist will usually check your vision, eye pressure, and the health of your eyes. They may also do tests such as a refraction test to measure your eyeglass prescription, color vision tests, slit lamp exam, and retinal imaging to check for any diseases or signs of damage. They might also review your medical history and ask questions about any eye-related symptoms or concerns you have. Finally, the optometrist may recommend new eyeglasses or contact lenses for you.

[How to find the best doctor to fit contact lenses for Pediatric Aphakia](#)

What is Pediatric Aphakia?

Paediatric Aphakia is a condition in which a child has no crystalline lens in their eye due to congenital or traumatic cataracts. This can lead to poor vision and other complications, which may require contact lenses to be fitted. However, finding the best doctor to fit contact lenses for pediatric aphakia can be challenging. This article will provide helpful tips on how to find the best doctor for your child and will discuss why Michigan Contact Lens is an excellent choice for those living in the metro Detroit area.

Look for a Pediatric Optometrist

The first step in finding the best doctor to fit contact lenses for pediatric aphakia is to find a pediatric Optometrist. These doctors specialize in eye care for children and have received additional training to diagnose and treat eye conditions in infants, toddlers, and adolescents. They have experience in fitting contact lenses for children and will know the specific types of lenses that are suitable for pediatric aphakia. They will also know how to adjust the lenses to ensure a good fit.

Ask for Referrals from Other Parents

Another way to find the best doctor to fit contact lenses for pediatric aphakia is to ask other parents of children with similar eye conditions. They may be able to recommend a doctor who has experience in fitting contact lenses for pediatric aphakia. They may also be able to provide feedback on the doctor's skills and bedside manner. You can also search online for support groups for parents of children with pediatric aphakia.

Check the Doctor's Credentials

When choosing a doctor to fit contact lenses for pediatric aphakia, it is important to check their credentials. You can start by checking their website or calling their office to ask about their qualifications and experience. Look for a doctor who has received additional training in pediatric Optometry and has experience in fitting contact lenses for children.

Consider the Doctor's Bedside Manner

When choosing a doctor to fit contact lenses for pediatric aphakia, it is important to consider their bedside manner. Children can often be scared or anxious when visiting the doctor, so it is essential to find a doctor who is patient and reassuring. The doctor should also be able to explain the fitting process to both you and your child in a way that is easy to understand. Look for a doctor who is warm, friendly, and compassionate.

Look for a Doctor Who Offers a Wide Range of Contact Lenses

When choosing a doctor to fit contact lenses for pediatric aphakia, it is important to find one who offers a wide range of [contact lenses](#). Different types of lenses may be needed depending on the severity of your child's condition, their age, and their lifestyle. Your doctor should be able to recommend the best type of lens for your child and adjust it for a perfect fit. Look for a doctor who offers both [soft lenses](#) and [rigid gas-permeable lenses](#).
